Note: Support for virtual environment is based on our server-virtualised product policy.

- \*1: OS supports the following languages: Japanese, English, Simplified Chinese, Traditional Chinese and Korean.
- \*2: Only when updating from ApeosWare Image Log Management 1.0.1.2 or earlier.
- \*3: The capacity required for 600000 jobs (assuming 2.2 MB per job) to be stored and searched.
- \*4: Required hard disk capacity depends on how the device is used and how image logs are stored. Note that the expired data (excluded data) will remain on the hard disk. Delete the excluded data or copy it to other media.
- \*5: Perform the following settings:
  - Activate JavaScript™ and ActiveX® Control.
  - Disable [Internet Explorer Enhanced Security Configuration] (enabled by default).
- \*6: Can be installed with the DVD-ROM enclosed with the software package for an Image Log Management product.
- \*7: Japanese SQL Server® (64-bit version only) and English SQL Server® (32- and 64-bit) are supported. Non-Japanese operation systems use English version of SQL Server®.
